## **Agency Overview**

The Idaho State Legislature created the Idaho Department of Fish and Game in 1899. In 1938, by voter initiative, the Fish and Game Commission was created to set policy for the Department. Commissioners are appointed by the Governor from the 7 administrative regions of the Department: Panhandle, Clearwater, Southwest, Magic Valley, Southeast, Upper Snake, and Salmon.

The Director, Steven M. Huffaker, is appointed by the Commission and serves as Secretary to the Commission and leader of the Department. The Department's 525 classified employees are divided into seven core functions: administration, communications, enforcement, engineering, fisheries, natural resources policy, and wildlife. Each function is divided into operations and program staff. Operations staff, led by Regional Supervisors, implements Department programs in 7 regional offices. Boise program staff, led by Bureau Chiefs, direct and integrate statewide operations as well as hatchery, research, intergovernmental, and interagency programs. The Department's strategic plan, The Compass, was adopted in 2005 and describes the goals, desired outcomes, and objectives of the Department.

The Department's 2006 budget of \$75 million is funded by license and tag sales, federal and private grants, and contracts. The budget does not include any annual Idaho general tax revenue appropriation. Hunters, anglers, and wildlife viewers in Idaho generate \$1.6 billion in economic output that provides nearly 20,000 jobs and over \$63 million in sales tax revenue to Idaho (in 2001 dollars).

Key challenges to achievement of the Department's mission are population growth and development, changes in how people use the land, and how they value fish and wildlife.

## Core Functions/Idaho Code

The Department's mission and charter are outlined in Idaho Code, Section 36-103. Briefly, it states that all wildlife in Idaho is to be preserved, protected, perpetuated and managed for the citizens of the state and to provide for continued supplies for hunting, fishing and trapping.

To fulfill this mission, the Department has four goals:

- Sustain Idaho's fish and wildlife and the habitats upon which they depend.
- Meet the demand for fish and wildlife recreation.
- Improve public understanding of and involvement in fish and wildlife management.
- Enhance the capability of the Department to manage fish and wildlife and serve the public.

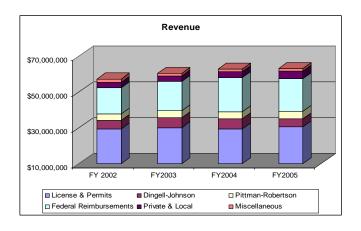

The Department achieves its goals through its core functions:

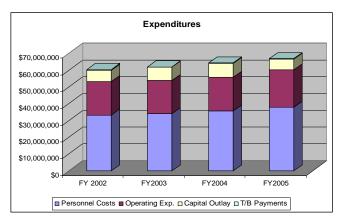

- Administration Provide fiscal services, information technology, and internal controls.
- Communications Inform, educate, and involve people in the management of Idaho's fish and wildlife.
- Enforcement Enforce the law and provide public information to increase compliance with regulations.
- Engineering Construct and maintain facilities in a cost-effective, efficient, and safe manner.
- <u>Fisheries</u> Inventory, monitor, and manage Idaho's fish resources.
- Natural Resources Policy Promote land and water use sustaining Idaho's fish and wildlife resources.
- Wildlife Inventory, monitor, and manage Idaho's wildlife resources.

<sup>&</sup>lt;sup>a -</sup> Measure based on a calendar year.

## **Performance Highlights:**

The Department continued Mule Deer Initiative efforts to protect and improve habitat, increase mule deer numbers, manage predators, provide more hunter access, and keep the mule deer hunting public informed.

Improved bighorn sheep populations by transplanting 62 bighorn sheep from the Lost River range and raised \$248,000 to benefit bighorn sheep through the sale of 2 special bighorn sheep tags.

Cooperated with the Office of Species Conservation in efforts to delist the wolf and Yellowstone grizzly bear and return management authority to the state of Idaho.

Radio-collared 981 deer, elk, and moose in Idaho's largest ever project on elk, deer, and moose survival providing information necessary for balancing big game and wolf populations.

Expanded the Access Yes program to over 750,000 acres of private land, thereby providing increased sportsmen access.

Launched the "Hunt Planner" (http://fishandgame.idaho.gov/ifwis/huntplanner), an internet-based search engine providing information on hunting and regulations and one-stop shopping for sportsmen wishing information on travel, services, drawing odds, printable maps, hunt boundaries and more.

Promoted safe and responsible use of OHV's through the Idaho Interagency Off-Highway Vehicle Coordinating Committee campaign encouraging OHV users to "use their power responsibly".

Implemented the Regional Investigator program in 6 regions to focus enforcement efforts on habitual wildlife criminals, including those involved in the illegal commercialization of fish and wildlife.

Increased public outreach by sending 359,781 informational emails to 5,016 subscribers using the GovDocs email delivery system. The number of subscribers continues to increase.

Held the first salmon fishery in the Upper Salmon River since the late 1970's.

Re-established the perch fishery in Cascade Reservoir in the Southwest Region.

Established a new trout fishery in the recently constructed Deer Creek Reservoir in the Clearwater Region.

State of Idaho Page 4 Agency Profiles

<sup>&</sup>lt;sup>b</sup>-Tally is incomplete for 2005

<sup>&</sup>lt;sup>c</sup>-Measure combines fiscal and calendar years.

<sup>&</sup>lt;sup>d</sup>-Service began in late 2005.

Reinforced the case for delisting bull trout by providing extensive scientific information during the Five Year ESA Status Review of this ESA listed species.

Began a ground breaking nutrient enhancement program in the Kootenai River to help increase game fish, Kootenai River sturgeon, and burbot populations.

Increased by 30% over last year the number of acres of private lands improved for wildlife habitat. Over 6,800 acres of uplands and wetlands were put in conservation program agreements to improve wildlife habitat.

Acquired more than 700 acres of important mule deer and elk winter range within the Tex Creek Wildlife Management Area in the Upper Snake Region.

Collaboratively developed a draft Idaho Sage Grouse Conservation Plan involving the Idaho Cattle Association, Idaho Conservation League, Idaho Department of Agriculture, U.S. Bureau of Land Management, Idaho Department of Lands, and Office of Species Conservation.

Completed the Comprehensive Wildlife Conservation Strategy, a conservation framework for Idaho species in greatest conservation need. Implementation of the strategy will help preclude ESA listings and facilitate federal funding for species conservation.

Cooperatively implemented the Slickspot Peppergrass Conservation Agreement, helping avoid listing of this species under ESA.

Completed construction of regional Offices in the Salmon, Magic Valley and Clearwater regions; improving customer service, public meeting, and employee space and facilities.

Eliminated the separate Department payroll process and moved to I-Time, reducing Department administrative costs.

Installed Citrix computer application to provide field and traveling employees high speed use of all Department computer systems, applications, and networks with full security.

Provided wireless-enabled computer access in all offices, allowing use of the network and internet without costly office retrofits.

Simplified the Department's activity-based accounting system, reducing the number of transactions by 40%.
